Delivery and installation shall be completed by 15 December 2004.

CONTROL SYSTEM SPECS

BURNER MANAGEMENT CONTROL SYSTEM AT THE SOO LOCKS

Provide the necessary supplies, materials, and services to replace the current burner management system with new controls, new remote communication, and a new hot water storage tank with heat exchanger and control valve. The contractor will be required to remove the existing controls and to install the new system.

Provide a professionally engineered and integrated burner management for 3 existing boilers, on-site training, and warranty for:

- ? A microprocessor based burner management control system with self-diagnostics and non-volatile memory Fireye Flame Monitoring burner management system model E110 or equal; with a Fireye E300 Expansion Module or equal.
- ? 1 Master Controller (Moore PAC 353 Process Automation Controller or equal)
- ? 3 Controllers (Moore PAC 353 Process Automation Controller or equal)
- ? A 200-gallon (minimum) hot water tank to deliver preheated water to all 3 existing boilers.
- ? An automatic telephone programmable alarm system (AD 2000 or equal).

This work will also require removal and reconfiguration of some existing equipment. All work required for successful installation and the contractor shall perform integration necessary to provide a fully functional and operating system.

SPECIFICATIONS:

Site Location: The existing system is in the Soo Locks Facility in Ste. St. Marie, Michigan. The contractor is responsible for delivery, installation, and training at this facility. Access to the site is difficult and the Government will provide limited assistance. See “Additional Requirements” below.

Description of current system: There are 3 existing boilers, Mohawk model number MS4-5-750-S150-GP/LPG, and each have their own individual controllers. These controllers are Honeywell BCS 7700’s, which are to be removed and given to the government for disposal. The existing Mod 4 master controller is not working properly and shall also be removed and given to the government for disposal. Each boiler has it’s own chain valve located above the boiler (these valves shall be replaced- see “Additional Requirements” below). The current monitoring software for the system is Honeywell Combustion System Manager, V1.02B, and shall also be replaced by the contractor.

DESCRIPTION OF REQUIRED SYSTEM:**Controllers:**

The new controllers shall meet or exceed the following requirements:

- ? A Master Controller (Moore PAC 353 Process Automation Controller (or equal) capable of supporting 25 control and/or logic loops. This will be the Plant Master and shall be mounted separately from the boilers.
- ? A Moore PAC 353 Controller (or equal) shall be installed on each of the 3 existing boilers.

Minimum requirements for the controllers:

The firing order (lead/lag) is operator selected using push buttons located on the controller faceplate (front).

The plant Master establishes the firing rate demand as steam pressure changes. After the lead boiler modulates to high fire (80%), the control calls the lag boiler on-line. Once the demand is met, all boilers will modulate in parallel. When demand decreases, all boilers will modulate to low fire (30%) before the control determines the lag boiler off-line.

Operator can select:

- Disable lead/lag
- Lag boilers standby
- Maintain low fire
- Start boiler

Burner Management:

The Honeywell BCS 7700’s shall be removed and replaced with the Fireye system or equal.

The Fireye Flame Monitoring burner management system Model #E110, (or equal) provides the proper burner sequencing, ignition, and flame monitoring protection for the automatically ignited natural gas. In conjunction with limit and operating controls, it programs the burner blower motor, ignition and fuel devices to provide full modulating firing with proven low fire start. On safety shutdowns, a message center will advise the operator of the cause as well as the position in the sequence it occurred.

The Fireye E300 Expansion Module (or equal) provides increased interlock supervision capability of the Flame Monitor. The E300 problem solving system reduces troubleshooting time and expense. It expands the standard 42 display messages of the Flame Monitor to include an additional 31 diagnostic messages.

200 Gallon (minimum) Hot Water Tank

Provide and install a new hot water storage tank with heat exchanger and control valve to preheat boiler make-up from 80 degrees F. to 150 degrees F. Size should be a minimum of 200 gallons and be able to fit into the existing location, which is 4'L X 3'W X 9'H.

Remote Communication:

The remote communication system shall provide a number of functions including flame safeguard supervision, alarm point monitoring, auto dial, gateway operation for a shared phone line, relay output scheduling and power interruption history. It will supervise the operation of the 3 Fireye Flame Monitor Controls and provide dial-out alarm notification concerning a number of user selectable features. The system shall monitor the Master Sequence Control over a shared single telephone line and allow the operator to use both systems.

Provide and install an automatic telephone alarm system that can be programmed to dial pagers or phones. Specific model AD 2000 (or equal).

Additional Requirements:

The contractor is required to perform all the work necessary to install and operate a fully functional system: all field wiring of the new control system; all modifications, adjustments and calibrations to the existing government-owned equipment; all changes to gas lines, fittings, or valves.

Provide and install electric steam header valves on 3 existing boilers.

The installed system and all components provided by the Contractor must meet ASME Standards "Boiler and Pressure Vessel Code". The Contractor must have Class 4B, and Class 3 boiler and steam licenses.

Provide one full day (8 hours) of on-site training for 4-6 employees in the operation and maintenance of the system. Training shall not take place until system is fully installed and functional. In addition, the Contractor shall provide a half-day (4 hours) of on-site follow-up training for 4-6 employees 45 to 60 days after the initial training session. Warranty must be a minimum of one (1) year for labor and the applicable manufacturer's warranty for parts.

Access to the project site is difficult; it is on the West Center Pier of the Soo Locks. The Contractor will be required to haul smaller items and tools across the lock gate. The Government will provide assistance moving larger items such as the 200-gallon water tank using Government-owned floating plant. An on-site visit at the Soo Locks Facility is highly recommended prior to submitting a bid.

Delivery and installation Shall be completed by 15 December 2004.

CLAUSES INCORPORATED BY FULL TEXT

52.204-7 CENTRAL CONTRACTOR REGISTRATION (OCT 2003)

(a) Definitions. As used in this clause--

Central Contractor Registration (CCR) database means the primary Government repository for Contractor information required for the conduct of business with the Government.

Data Universal Numbering System (DUNS) number means the 9-digit number assigned by Dun and Bradstreet, Inc. (D&B) to identify unique business entities.

Data Universal Numbering System +4 (DUNS+4) number means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional CCR records for identifying alternative Electronic Funds Transfer (EFT) accounts (see the FAR at Subpart 32.11) for the same parent concern.

Registered in the CCR database means that--

(1) The Contractor has entered all mandatory information, including the DUNS number or the DUNS+4 number, into the CCR database; and

(2) The Government has validated all mandatory data fields and has marked the record "Active".

(b)(1) By submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the CCR database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.

(2) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation "DUNS" or "DUNS +4" followed by the DUNS or DUNS +4 number that identifies the offeror's name and address exactly as stated in the offer. The DUNS number will be used by the Contracting Officer to verify that the offeror is registered in the CCR database.

(c) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number--

(i) If located within the United States, by calling Dun and Bradstreet at 1-866-705-5711 or via the Internet at <http://www.dnb.com>; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office.

(2) The offeror should be prepared to provide the following information:

(i) Company legal business.

(ii) Tradestyle, doing business, or other name by which your entity is commonly recognized.

(iii) Company Physical Street Address, City, State, and Zip Code.

(iv) Company Mailing Address, City, State and Zip Code (if separate from physical).

(v) Company Telephone Number.

(vi) Date the company was started.

(vii) Number of employees at your location.

(viii) Chief executive officer/key manager.

(ix) Line of business (industry).

(x) Company Headquarters name and address (reporting relationship within your entity).

(d) If the Offeror does not become registered in the CCR database in the time prescribed by the Contracting Officer, the Contracting Officer will proceed to award to the next otherwise successful registered Offeror.

(e) Processing time, which normally takes 48 hours, should be taken into consideration when registering. Offerors who are not registered should consider applying for registration immediately upon receipt of this solicitation.

(f) The Contractor is responsible for the accuracy and completeness of the data within the CCR database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the CCR database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the CCR database to ensure it is current, accurate and complete. Updating information in the CCR does not alter the terms and conditions of this contract and is not a substitute for a properly executed contractual document.

(g)(1)(i) If a Contractor has legally changed its business name, "doing business as" name, or division name (whichever is shown on the contract), or has transferred the assets used in performing the contract, but has not completed the necessary requirements regarding novation and change-of-name agreements in Subpart 42.12, the Contractor shall provide the responsible Contracting Officer a minimum of one business day's written notification of its intention to (A) change the name in the CCR database; (B) comply with the requirements of Subpart 42.12 of the FAR; and (C) agree in writing to the timeline and procedures specified by the responsible Contracting Officer. The Contractor must provide with the notification sufficient documentation to support the legally changed name.

(ii) If the Contractor fails to comply with the requirements of paragraph (g)(1)(i) of this clause, or fails to perform the agreement at paragraph (g)(1)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the CCR information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the "Suspension of Payment" paragraph of the electronic funds transfer (EFT) clause of this contract.

(2) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the CCR record to reflect an assignee for the purpose of assignment of claims (see FAR Subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the CCR database. Information provided to the Contractor's CCR record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the "Suspension of payment" paragraph of the EFT clause of this contract.

(h) Offerors and Contractors may obtain information on registration and annual confirmation requirements via the internet at <http://www.ccr.gov> or by calling 1-888-227-2423, or 269-961-5757.

(a) Method of payment. (1) All payments by the Government under this contract shall be made by electronic funds transfer (EFT), except as provided in paragraph (a)(2) of this clause. As used in this clause, the term “EFT” refers to the funds transfer and may also include the payment information transfer.

(2) In the event the Government is unable to release one or more payments by EFT, the Contractor agrees to either--

(i) Accept payment by check or some other mutually agreeable method of payment; or

(ii) Request the Government to extend the payment due date until such time as the Government can make payment by EFT (but see paragraph (d) of this clause).

(b) Contractor's EFT information. The Government shall make payment to the Contractor using the EFT information contained in the Central Contractor Registration (CCR) database. In the event that the EFT information changes, the Contractor shall be responsible for providing the updated information to the CCR database.

(c) Mechanisms for EFT payment. The Government may make payment by EFT through either the Automated Clearing House (ACH) network, subject to the rules of the National Automated Clearing House Association, or the Fedwire Transfer System. The rules governing Federal payments through the ACH are contained in 31 CFR part 210.

(d) Suspension of payment. If the Contractor's EFT information in the CCR database is incorrect, then the Government need not make payment to the Contractor under this contract until correct EFT information is entered into the CCR database; and any invoice or contract financing request shall be deemed not to be a proper invoice for

the purpose of prompt payment under this contract. The prompt payment terms of the contract regarding notice of an improper invoice and delays in accrual of interest penalties apply.

(e) Liability for uncompleted or erroneous transfers. (1) If an uncompleted or erroneous transfer occurs because the Government used the Contractor's EFT information incorrectly, the Government remains responsible for--

(i) Making a correct payment;

(ii) Paying any prompt payment penalty due; and

(iii) Recovering any erroneously directed funds.

(2) If an uncompleted or erroneous transfer occurs because the Contractor's EFT information was incorrect, or was revised within 30 days of Government release of the EFT payment transaction instruction to the Federal Reserve System, and--

(i) If the funds are no longer under the control of the payment office, the Government is deemed to have made payment and the Contractor is responsible for recovery of any erroneously directed funds; or

(ii) If the funds remain under the control of the payment office, the Government shall not make payment, and the provisions of paragraph (d) of this clause shall apply.

(f) EFT and prompt payment. A payment shall be deemed to have been made in a timely manner in accordance with the prompt payment terms of this contract if, in the EFT payment transaction instruction released to the Federal Reserve System, the date specified for settlement of the payment is on or before the prompt payment due date, provided the specified payment date is a valid date under the rules of the Federal Reserve System.

(g) EFT and assignment of claims. If the Contractor assigns the proceeds of this contract as provided for in the assignment of claims terms of this contract, the Contractor shall require as a condition of any such assignment, that the assignee shall register separately in the CCR database and shall be paid by EFT in accordance with the terms of this clause. Notwithstanding any other requirement of this contract, payment to an ultimate recipient other than the Contractor, or a financial institution properly recognized under an assignment of claims pursuant to subpart 32.8, is not permitted. In all respects, the requirements of this clause shall apply to the assignee as if it were the Contractor. EFT information that shows the ultimate recipient of the transfer to be other than the Contractor, in the absence of a proper assignment of claims acceptable to the Government, is incorrect EFT information within the meaning of paragraph (d) of this clause.

(h) Liability for change of EFT information by financial agent. The Government is not liable for errors resulting from changes to EFT information made by the Contractor's financial agent.

(i) Payment information. The payment or disbursing office shall forward to the Contractor available payment information that is suitable for transmission as of the date of release of the EFT instruction to the Federal Reserve System. The Government may request the Contractor to designate a desired format and method(s) for delivery of payment information from a list of formats and methods the payment office is capable of executing. However, the Government does not guarantee that any particular format or method of delivery is available at any particular payment office and retains the latitude to use the format and delivery method most convenient to the Government. If the Government makes payment by check in accordance with paragraph (a) of this clause, the Government shall mail the payment information to the remittance address contained in the CCR database.

(End of Clause)
